RESPONSE TO OFFICE ACTION

Asst. Commissioner for Patents
Washington, DC 20231

Sir:

This document is being filed in response to the Official Action mailed on August 24, 2001 and labeled paper number 5. The time set for responding to the Official action is three months. Therefore, a response is due on or before November 26, 2001. The following remarks are submitted in connection with the above-identified patent application. Reconsideration and reexamination of the application are respectfully requested at this time.

It is not believed that extensions of time or fees for net addition of claims are required, beyond those that may otherwise be provided for in documents accompanying this paper. However, in the event that additional extensions of time are necessary to allow consideration of this paper, such extensions are hereby petitioned under 37 C.F.R. § 1.136(a), and any fees required therefor (including fees for net addition of claims) are hereby authorized to be charged to Deposit Account No. 20-0778.

AMENDMENTS

(a) Please cancel claim 31 without prejudice or disclaimer.

(b) Please amend the claims as follows:

5. (Once Amended) The method of claim 4, wherein the resource constrained mode is one of a plurality of resource constrained modes determined by the user interaction.

6. (Once Amended) The method of claim 4, wherein the user interaction includes causing the video decoding system to reduce spatial resolution of video output.

7. (Once Amended) The method of claim 4, wherein the user interaction includes causing graphics to be generated and output along with the video output.

29. (Once Amended) A video decoding method comprising the steps of:
determining that a video decoding rate of received video input should be reduced while maintaining synchronization with an unmodified audio decoding rate; and
reducing the video decoding rate accordingly.

32. (Once Amended) A video decoding method comprising the steps of:
determining whether a picture repetition mode should be initiated;
initiating a mode of repeating pictures responsive to determining that the picture repetition mode should be initiated; and
wherein the determining step is responsive to a step of determining that at least one resource is constrained.
